Education

University of Wisconsin–Whitewater

B.S. / M.S. in Computer Science – Artificial Intelligence Emphasis | GPA: 3.8

Honors: Dean's List (6 semesters)

Relevant Coursework: Machine Learning (PyTorch/TensorFlow classifiers), Software Engineering, Advanced Databases, Data Science, Cloud Computing, Linear Algebra

Whitewater, WI

Expected May 2028

Research

University of Wisconsin–Whitewater

Undergraduate Researcher, advised by Dr. Hairi

Whitewater, WI

September 2026 – Present

- Researching personalized preference optimization (DPO) for AI alignment, focused on modeling varied individual driver preferences in autonomous-driving scenarios.
- Presenting the Direct Preference Optimization paper (Rafailov et al.) and RLHF background in weekly meetings; designing a simulated preference-data approach.

Projects

Fantasy Football Decision-Support Platform

Python, Streamlit, Polars, LightGBM

August 2026 – Present

github.com/Jqkeyyy/fantasyfootball

- Built a Sleeper/nflverse decision platform using 740K+ historical records (2015–2025), with API ingestion and Polars/Parquet caching for projections, draft, start/sit, waiver, and trade analysis.
- Developed leakage-safe LightGBM/scikit-learn pipelines with ~50 features and five-season walk-forward validation; improved availability Brier score from 0.220 to 0.148 and cut DST projection error 9–10%.
- Implemented up to 20K Monte Carlo matchup simulations, 3K season paths, and PuLP/CBC lineup optimization; backed by 1,265 pytest tests across 85 modules with strict mypy/Ruff checks.

Experience

Rock County Information Technology

IT Deskside Support Intern

Janesville, WI

July 2026 – Present

- Built a PowerShell migration script that copies required user directories to cloud storage in ~30 seconds, replacing manual folder-by-folder transfers.
- Support 500+ county users across 28 departments through Active Directory account/permission management and BitLocker recovery; helped image and deploy 100+ workstations.

Sass Web Design

Freelance Web Developer

Janesville, WI

April 2024 – Present

- Generated \$5K+ in freelance revenue across 5 clients, with 2 production websites and 5 projects in active development.
- Build full-stack React/Tailwind applications with databases and custom admin panels, owning design, development, deployment, and client communication.
- Built fitness assessment and contact forms generating 20+ submissions in month one for a gym client, mycorestrong.com.

Summit Moving & Junk Removal LLC

Co-Founder & Software Engineer

Janesville, WI

June 2025 – July 2026

- Co-founded a moving and junk-removal company generating \$100K+ in gross revenue; built software to coordinate 200+ jobs across Wisconsin.
- Built a React and Supabase/PostgreSQL scheduling and logistics platform used by a 5-person team, replacing notes/chat with centralized job assignment, pricing, and equipment tracking.
- Developed an AI-assisted call and lead pipeline with n8n, Twilio, Vapi, and Anthropic API to record/transcribe calls, automate SMS follow-ups, and centralize leads.

Skills

Languages: Python, Java, C, C#, TypeScript, JavaScript, SQL, R, PowerShell, HTML/CSS

Frameworks & ML: React, React Native, Node.js, .NET, Vite, Tailwind CSS, Streamlit, Polars, pandas, NumPy, scikit-learn, LightGBM, PyTorch, TensorFlow

AI & LLM: Anthropic/Claude API, MCP, Vapi, n8n, LLM agent workflows

Data & Tools: PostgreSQL, Supabase, Firebase, REST APIs, Git/GitHub, Docker, Vercel, Linux, Jupyter, pytest, Twilio, Figma, Postman, Active Directory
